- Touchscreen !

Support: Driver (Windows)

This TFT monitor is connected to a Windows PC USB connector. The display is working as an additional display which can be added to the main display area on the left, right, upper or lower. Alternatively it can mirror the primary screen. The display can be swiveled in steps of 90°.

In addition, the UM-720S model comes with touchscreen.

The UM-720S comes with integrated mounting and protection ! Simply turn over the rear side of the display to get a stand.
